

**In the Specification**

Please replace the paragraph beginning on page 1, line 7 with the following amended paragraph:

Chairs with retractable tablets that move between operative and stored positions are well-known in the art. Examples of the prior art are ~~shows~~ shown in the following prior patents:

Please replace the paragraph beginning on page 5, line 3 with the following amended paragraph:

The chair back 28 is carried on the back frame 40 that, in turn, is connected to the top bar 42 which joins the top ends of the frame front legs 36. The back frame 40 includes an inverted U-shaped portion 44 that extends upwardly from the rear of forwardly extending generally horizontal arms 46 that comprise the second seat frame 32. The arms 46 are attached to top bar 42 by brackets 48. The arms 46 are also joined by a rigid cross bar 50 disposed below and spaced from the seat 26. The brackets 48 are permitted limited pivotal motion on the top bar 42 to enable the backrest to pivot rearwardly approximately 20° to an inclined position when the chair occupant pushes back against the backrest, as shown in full lines in FIG. 6.
